

# Medical Image Processor MS-8

The all-around upgraded medical image processor by HugeMed™ adopts a new operating system, which serves as a central system to facilitate easier reading and operating in various endoscopy applications. This is especially important for occasions requiring mobility within hospitals.

**DICOM**  
DICOM Protocol available.

**Diagnostic report**  
Built-in reporting improves endoscopy efficiency.

**Image Quality**  
Full HD output  
1920\*1080 px

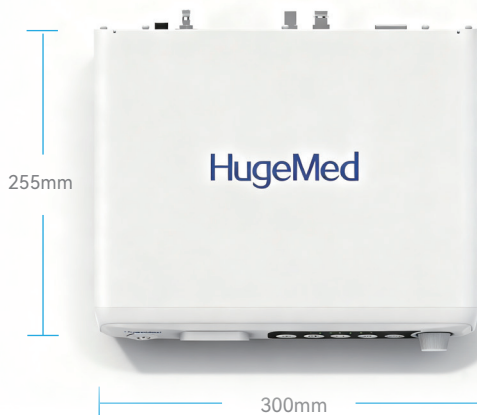

**Laser filtering**  
Eliminates laser noise for sharper visualization.

# Medical Image Processor HUV-02

## Compact Design, Maximum Space Efficiency

Designed to occupy minimal footprint in the operating room—saving precious space without compromising performance.

## User-Centric Operation Design

- ✔ Smooth Rotary Knob
- ✔ Responsive Button
- ✔ Effortless Control
- ✔ Full HD Output
